

Part of the Solution

That is the focus of Aviation Camps of the Carolinas Inc. First we show young people these amazing secret careers in aviation. Then we give them permission to actually believe that they could do these wonderful jobs. We topped that off with a confidence builder that makes them realize, of course, "I can do anything I want to do." That's not so simple. You hear it everyday but how do you actually put one foot in front of the other and accomplish a goal that you never thought was within your reach? That is what Aviation Camps of the Carolinas is all about.

When a student knows how to break the stereotype, they immediately self motivate themselves in the direction that gives them the most joy. And on their own, they realize that it's going to take some extra effort on their part to study, learn, and elevate their learning process to achieve new goals.

Who would not want to be a part of that? Students who want to learn! When they come to Aviation Camps of the Carolinas they leave with a whole new perspective that they can incorporate at any school, at any time, overcoming any set back, leaping well ahead of their friends, surprisingly, becoming everything they've ever wanted to be.

We don't teach. We don't quiz. We don't ask for essays. When students come to us we give them back to you with a higher emphasis on motivation and completing their studies, and even, their homework. And isn't that what we want?

We in the Charlotte region and the nation want a workforce who is energetic, who has technology in their DNA, and is looking for a satisfying place in the world where they can exhibit the energy they have and make a difference. I am looking forward to them leading our nation and the world and inventing and improving the things I need now, and will need in the future. Be a part of the solution. Help us make this available to every student in the region.

This is how I got my start and I will never look back. All I want to do is excel and achieve great things; not for myself, but for the young people of our region who never thought to dream beyond the 12 mile Horizon, reality shows, and current event TV offer as an option.

My name is Brenda Robinson and I am the first African American female Navy pilot. After 43 years of flying 12 different airplanes, retiring from American Airlines as a widebody pilot, I know what it takes to get the job done. And I want every student that I ever come in contact with to know the details on how to follow in my footsteps. Do you want to be a part of that solution? Join us and support the Aviation Camps of the Carolinas and its initiatives which you can find here at: <http://brendaerobinson.com/Non-ProfitGoals>

Students get to see secret behind the scenes careers they will see nowhere else. Just a taste of what students in April and June will get to actually experience is lifestyle, salary, and the coolness of being involved in aviation. But I am quick to point out; aviation is only one of thousands of careers students will be able to reach out to. They just don't realize that there are no limitations. But once they've experienced this Camp, you cannot hold them back.

Please join us by sponsoring students from the signup list, or donate directly to the camp at "successfulattitude.com/Donate2Camp.html." Tell your company or organization, that this is where their support and energy should be when they want to make a difference in our Community City and Country. These are our future decision-makers and leaders. Thanks to your support.
